

8206 Transmitter

Digital O.R.P. transmitter

- Compact, remote versions for DN15 to DN200
- Fully configurable O.R.P. transmitter for all kinds of O.R.P.-measurement tasks
- Large range of process connections with various fittings
- Multi language, menu-guided operation

Type 8206 can be combined with...

Type S020
INSERTION fitting

Type 6642
Solenoid valve

Type 8802
Process control valve

Type 2030
On/Off Diaphragm valve

Type 8644
Valve islands

PLC

The O.R.P. transmitter is available in different models:

- Compact O.R.P. transmitter with integrated O.R.P. probe
It can be installed into pipes by using INSERTION Type S020 fittings or other suitable installation materials. It can also be installed in tanks or containers by using an industrial immersion fitting.
- Remote O.R.P. transmitter, for panel or wall mounting, to connect to an O.R.P. probe mounted into a Bürkert probe holder Type 8200 (max. 10 m) which can be installed into pipes by using INSERTION Type S020 fittings or using its own particular connection. It can also be installed in tanks or containers by using an industrial immersion fitting.

The simulation mode allows easy and fast verifying of the output signals prior to start up.

Technical data (common to the various versions)	
General data	
Display	15x60 mm, 8-digit LCD, alphanumeric, 15 segments, 9 mm high
Electrical connections	shielded cable with 1.5 mm ² max. cross-section
Environment	
Relative humidity	< 95%, without condensation
Standards, directives and approvals	
Standard and directives	
EMC	EN 61000-6-3, EN 61000-6-2
Security	EN 61010-1
Pressure	Complying with article 3 of §3 from 97/23/CE directive.*
Vibration	EN 60068-2-6
Shock	EN 60068-2-27

* For the 97/23/CE pressure directive, the device can only be used under following conditions (depend on max. pressure, pipe diameter, type of probe and fluid).

Type of fluid	Conditions
Fluid group 1, §1.3.a	DN25 only
Fluid group 2, §1.3.a	DN ≤ 100
Fluid group 1, §1.3.b	DN ≤ 100
Fluid group 2, §1.3.b	DN ≤ 100

System versions

The compact version

combines a O.R.P. sensor and an electronic module with a display in an IP65 enclosure.

The access to the output terminals are provided via two cable glands or a cable plug EN175301-803.

Bürkert designed fitting ensures simple direct installation of the Bürkert transmitter into pipes from DN15 to DN200.

The panel-mounted version

consists of an electronic module 8206 integrated in a front-cover. The associated separate O.R.P. sensor consists of a O.R.P. probe mounted into a Bürkert probe holder Type 8200.

The output signals are provided on a terminal strip.

The wall-mounted version

consists of an electronic module 8206 in an IP65 enclosure. The associated separate O.R.P. sensor consists of a O.R.P. probe mounted into a Bürkert probe holder Type 8200.

The output signals are provided on a terminal strip via cable gland.

Operation and display

Customized adjustments, such as measuring range, engineering units can be carried out menu-supported on site via a multilingual display.

The operation is classified according to three levels:

▶ Main Menu

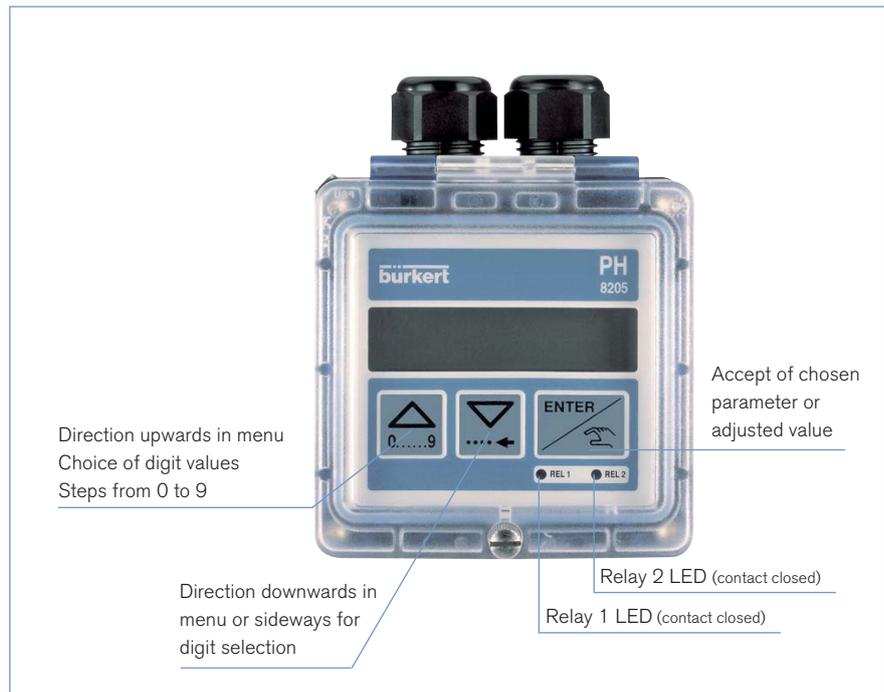

- O.R.P.
- output current
- HOLD function
- O.R.P. probe calibration

▶ Calibration Menu

- language
- measuring range 4-20 mA
- relay parameter definition
- filter selection

▶ Test Menu

- Offset
- Span
- simulation of O.R.P.

Compact O.R.P. transmitter Type 8206

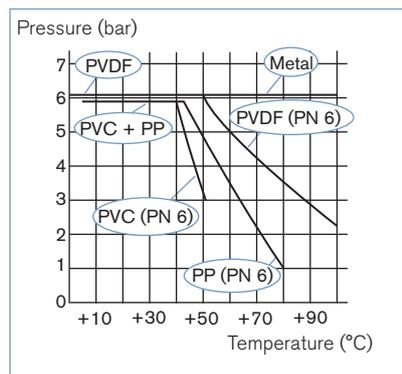

The sensor component consists of a replaceable combination O.R.P.-probe, screwed into the sensor holder.

The measured signal is conveyed to the transmitter via a coax plug.

The transmitter electronics converts the measured signal, displays the actual value and computes the output signals.

Pressure / temperature chart

Principle of operation

The most important part of the O.R.P. transmitter is the O.R.P. probe with its potential selective glass membrane. When the probe is immersed into the solution, an electron exchange occurs between the oxidised and the reduced state of electrolyte. The generated cell voltage is the redox potential, directly proportional to the O.R.P. value.

The transmitter functions in a two wire circuit (without relay) or three wire circuit (with relays - limit values freely adjustable) and requires a power supply of 12...30 V DC.

A 4...20 mA standard signal proportional to the O.R.P. is available as output signal.

Max. pressure at max. temperature	6 bar at 130°C (87PSI at 266°F)														
Diaphragm	Two clogging free "Single pores™"														
Reference electrolyte	polymer														

Installation

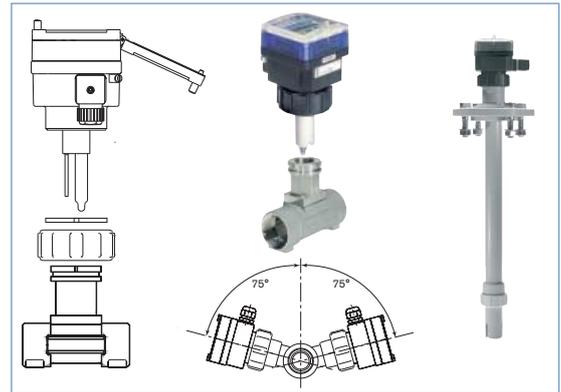

The 8206 O.R.P. transmitter has to be installed with a maximum angle of ± 75 degrees from vertical into any Bürkert INSERTION fitting (S020).

Select and install the required fitting onto the pipe, according to specific requirements of the sensor and fitting material (temperature and pressure). Then, cautiously install the unit on the fitting, and tighten with the nut.

In order to get a reliable measurement, air bubbles must be avoided, and the mounting location must ensure that the probe is continuously and completely immersed in the flow stream. When kept in inventory or the system is not in use, ensure the probe is in fluid and wet at all times; this prevents the probe from drying out which will result in probe failure.

The transmitter must be protected from constant heat radiation and other environmental influences, such as direct exposure to sunlight.

An industrial immersion kit allows installation of this transmitter into tanks or containers. The following lengths are available: 500, 1000, 1500, 2000 mm. Special lengths on request.

Dimensions [mm]

Remote O.R.P. transmitter Type 8206

The remote O.R.P. transmitter Type 8206 is available in 2 versions:

- Panel-mounted

- Wall-mounted

A separate O.R.P. sensor from Bürkert must be associated with this remote O.R.P. transmitter. This sensor consisting of a O.R.P. probe and a probe holder Type 8200 must be ordered separately.

General data	
Compatibility	Bürkert O.R.P. sensor
Materials	Housing, cover Front panel foil / Screws Cable glands
	PC (panel-mounted version); ABS (wall-mounted version) Polyester / Stainless steel PA
Electrical connection	Terminals (panel-mounted version) or terminals via 5 cable glands M16x1.5 (wall-mounted version)
Electrical data	
Power supply	Panel-mounted version Wall-mounted version
	12...30 V DC, filtered and regulated 12...30 V DC, filtered and regulated or 115/230 V AC - 50/60 Hz (see technical specifications 115/230 V AC)
Current consumption with sensor	≤ 80 mA - transmitter with relays ≤ 20 mA - transmitter without relay
Sensor input	Analog signal from O.R.P. probe
Cable length	max. 10 m (distance between sensor and transmitter)
Output	4...20 mA programmable (3-wire with relays, 2-wire without relay), proportional to O.R.P. max. loop impedance: 1000 Ω at 30 V DC; 750 Ω at 24 V DC; 250 Ω at 15 V DC 2 relays, freely configurable, 3A, 230 V AC
	Relays (option)
Environment	
Ambient temperature	0°C to +60°C (32°F to 140°F) (Operation and storage)
Standard	
Protection class	IP65 (panel-mounted and wall-mounted version) IP20 (panel-mounted version, inside the cabinet)
Technical specifications 115/230 VAC	
Voltage available in the device	27 V DC regulated, max. current: 250 mA integrated protection: fuse 250 mA temporised power: 6 VA

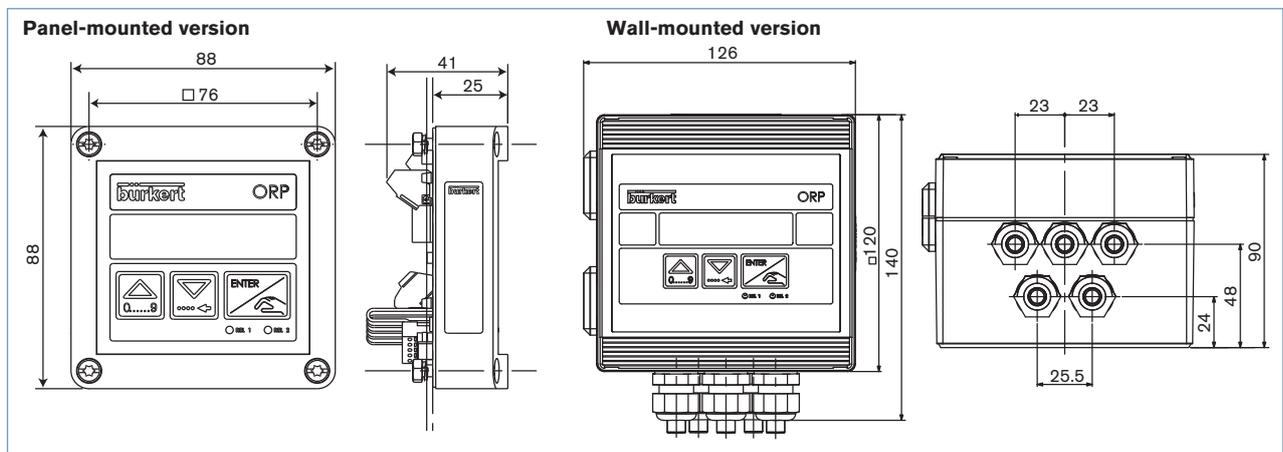

Installation

The remote 8206 O.R.P. transmitter has to be installed into a cabinet or on a wall. An O.R.P. sensor from Bürkert must be associated with this remote O.R.P. transmitter.

The O.R.P. sensor in its extended version can also be associated with an industrial immersion kit, which allows O.R.P. measurement into tanks or containers. The following lengths are available: 500, 1000, 1500, 2000 mm. Special lengths on request.

This sensor consisting of a O.R.P. probe and a probe holder must be ordered separately (see separate data sheet Type 8200).

Ordering chart for compact transmitter Type 8206

A complete compact O.R.P. transmitter Type 8206 consists of a compact O.R.P. transmitter Type 8206 and a Bürkert INSERTION fitting Type S020.

The following information is necessary for the selection of a complete device:

- Item no. of the desired O.R.P. transmitter **Type 8206** (see ordering chart, below)
- Item no. of the selected INSERTION fitting **Type S020** (DN15 - DN200 - see separate data sheet)

 When you click on the orange box "More info.", you will come to our website for the resp. product where you can download the data sheet.

→ You have to order two components.

Compact O.R.P. transmitter Type 8206

Specifications	Voltage supply	Output	Relays	Sensor version	Electrical connection	Item no.
Compact	12...30 V DC	4...20 mA	None	UNITRODE PLUS O.R.P.	EN 175301-803	418 836
					2 cable glands	418 850
			2	UNITRODE PLUS O.R.P.	2 cable glands	418 837

FKM gasket in standard; 1 Kit including a black EPDM gasket for the sensor, an obturator for an M20x1.5 cable gland, a 2x6 mm multiway seal and a mounting instruction sheet is supplied with each transmitter with cable glands or 1 Kit including a green FKM and a black EPDM gaskets is supplied with each transmitter with connection EN 175301-803.

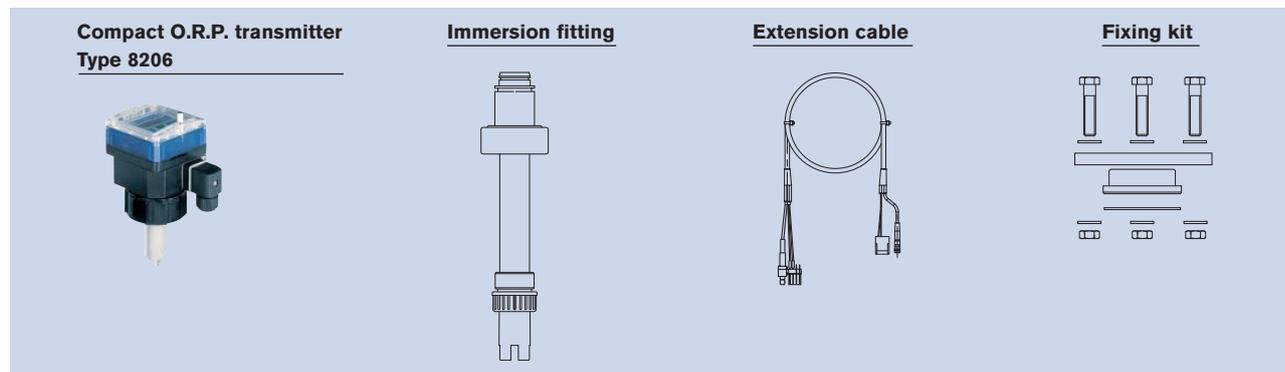

Tank installation with a compact O.R.P. transmitter Type 8206.

A compact O.R.P. transmitter Type 8206 for tank installation is made up of a compact O.R.P. transmitter Type 8206 and an immersion kit which is consisting of an immersion fitting, an extension cable for immersion fitting and a fixing kit (flange DN65 with stainless steel screws).

The following information is necessary for the selection of a complete device:

- Item no. of the desired compact O.R.P. transmitter **Type 8206** (see ordering chart on p. 6)
- Item no. of the immersion fitting (see accessories ordering chart on p. 8)
- Item no. of the extension cable for the immersion fitting (see accessories ordering chart on p. 8)
- Item no. of the fixing kit (flange DN65 with stainless steel screws - see accessories ordering chart on p. 8)

→ You have to order four components.

Ordering chart for remote transmitter Type 8206

A complete remote O.R.P. transmitter Type 8206 consists of a remote O.R.P. transmitter Type 8206, a O.R.P. sensor and a Bürkert INSERTION fitting Type S020.

The following information is necessary for the selection of a complete device:

- **Item no.** of the desired O.R.P. transmitter **Type 8206** (wall-mounted or panel-mounted version - see ordering chart, below)
- **Item no.** of the desired O.R.P. sensor made of O.R.P. probe and probe holder **Type 8200** (see separate data sheet) More info.
- **Item no.** of the selected INSERTION fitting **Type S020** (DN15 - DN200 - see separate data sheet) More info.

→ You have to order three components.

O.R.P. transmitter Type 8206 panel or wall-mounted version

Specifications	Voltage supply	Output	Relays	Sensor version	Electrical connection	Item no.

Wall-mounted	12...30 V DC	4...20 mA	None	8200	Cable glands	430 755
			2	8200	Cable glands	430 756
	115/230 V AC	4...20 mA	None	8200	Cable glands	430 757
			2	8200	Cable glands	430 758

Tank installation with a remote O.R.P. transmitter Type 8206.

A remote O.R.P. transmitter Type 8206 for tank installation is made up of a remote O.R.P. transmitter Type 8206, an immersion kit which is consisting of an immersion fitting, an extension kit for immersion fitting, a fixing kit (flange DN65 with stainless steel screws), a sensor holder with liquid earth rod, an O.R.P. probe, an shielded cable for O.R.P., a shielded cable for liquid earth rod and a seal.

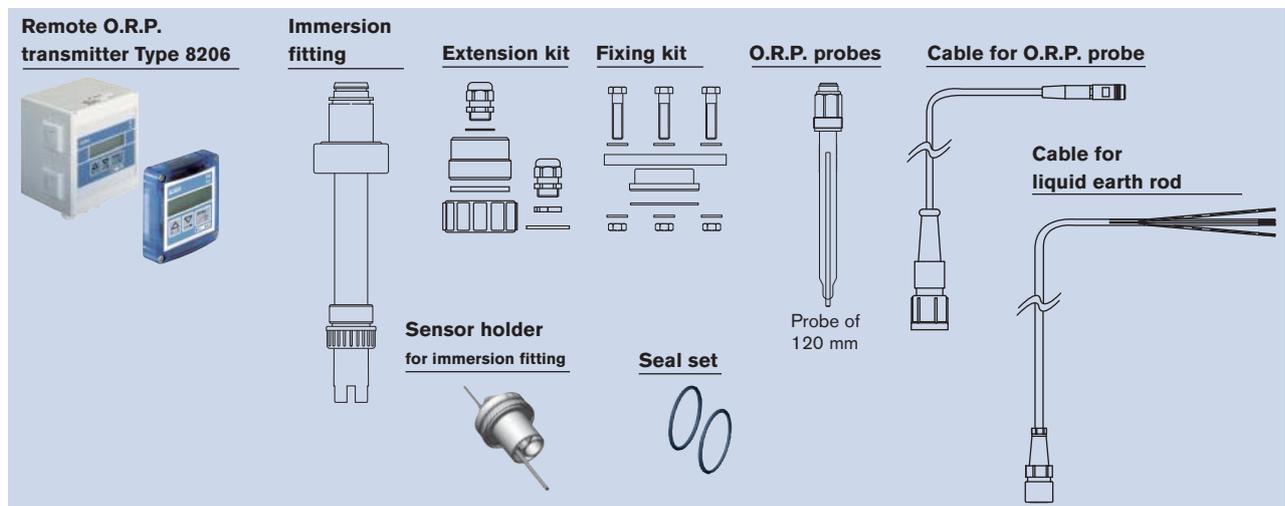

The following information is necessary for the selection of a complete device:

- **Item no.** of the desired remote O.R.P. transmitter **Type 8206** (wall-mounted or panel-mounted version - see ordering chart on p. 7)
- **Item no.** of the immersion fitting (see separate data sheet Type 8200)
- **Item no.** of the extension kit for the immersion fitting (see separate data sheet Type 8200)
- **Item no.** of the fixing kit (flange DN65 with stainless steel screws - see separate data sheet Type 8200)
- **Item no.** of the sensor holder with liquid earth rod (see separate data sheet Type 8200)
- **Item no.** of the 120 mm O.R.P. probe (see separate data sheet Type 8200)
- **Item no.** of the gasket set if EPDM desired (see separate data sheet Type 8200)
- **Item no.** of the shielded cable O.R.P. (see separate data sheet Type 8200)
- **Item no.** of the shielded cable for liquid earth rod (see separate data sheet Type 8200)

When you click on the orange box "More info.", you will come to our website for the resp. product where you can download Type 8200 data sheet.

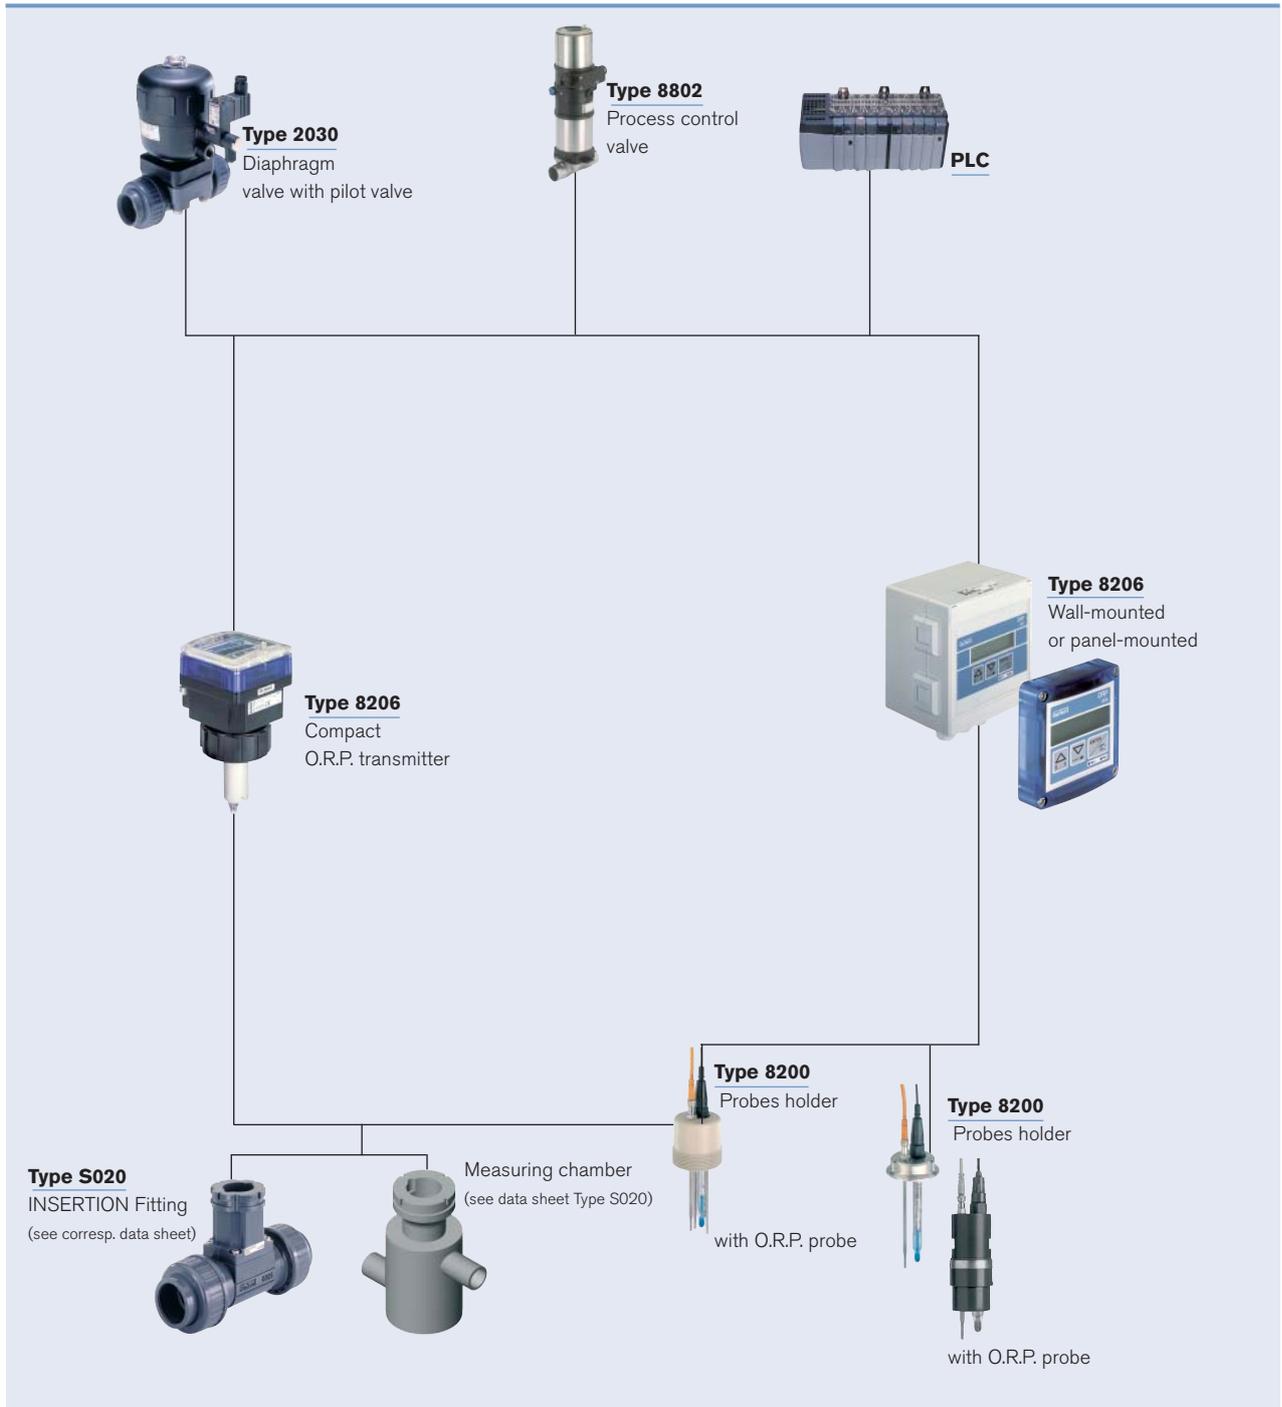

→ You have to order nine components.
